

AE MÓVEL BROKER: INSTALLATION REQUIREMENTS AND CONFIGURATIONS

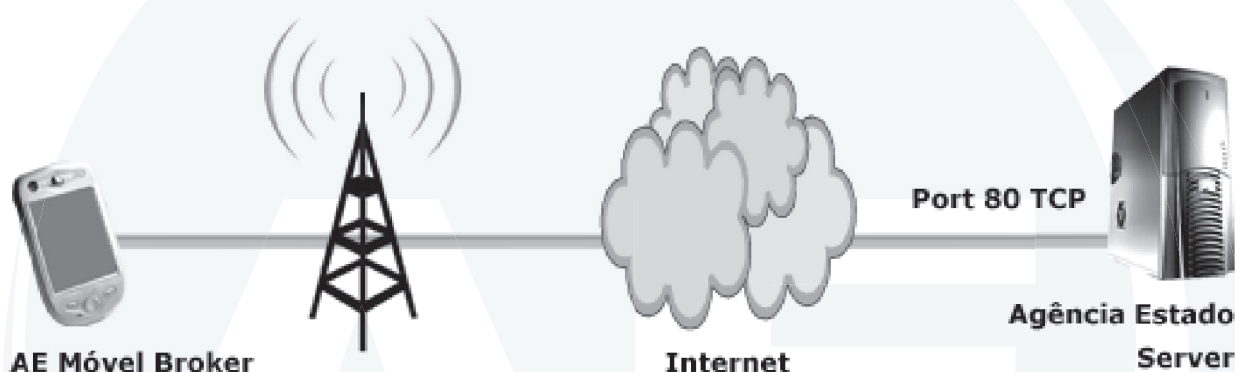

AE Móvel Broker

This platform can be executed on any mobile device having access to the Internet and support to the JAVA language.

This product is compatible with most devices currently in the market, from Blackberries to cell phones, including devices equipped with Windows Mobile and PalmOS.

It is available in two versions: basic (1.5), which is functional for most devices, and advanced (2.0), for more advanced devices (smartphones).

System Architecture

Firewall Configurations

Connection Source	Port	Type	Connection Destination
AE Móvel Broker	80	TCP	200.196.192.0/19 AS 14346 – Agência Estado

Prerequisites

Version 1.0

- Support to Java applications (J2ME): CLDC 1.0 e MIDP 2.0
- Configured access to the Internet;
- No minimum resolution required;
- Minimum space for installation: 200 KB.

Version 2.0

- Support to Java applications (J2ME): CLDC 1.0 e MIDP 2.0
- Configured access to the Internet;
- Minimum resolution required: 160x160 pixels;
- Minimum space for installation: 500 KB.

- Meeting the prerequisites is not enough to guarantee that the application will be perfectly executed, but a device does not support the application if the prerequisites are not entirely met.
- Access to the Internet must be configured and running adequately. This is usually handled by mobile telephone operators, and users should ask for their assistance in case of any problem.
- A resolution of 128x128 pixels or higher is suggested for better usability.
