

BADMINTON

1991/92

*D*esigned by Slazenger's European Research and Development team, the Mystique creates the most exciting and innovative racket ever seen on a badminton court.

Style, performance and technical excellence are encompassed in the Mystique producing an unforgettable playing experience.

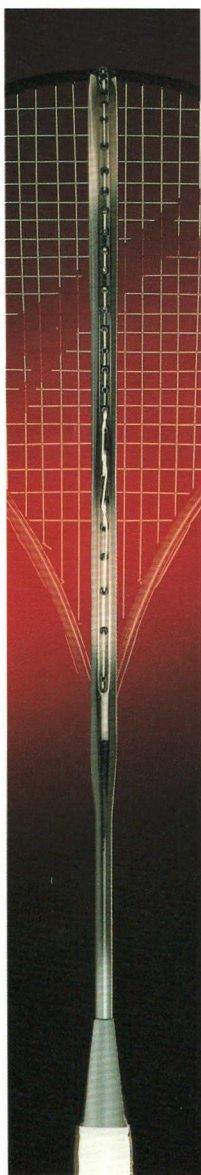

The Mystique combines the unique features of an extended throatless racket with the 'tear drop' head shape, increasing the power zone both in length via the extended central strings and in width towards the top of the racket through the flatter head shape.

The triple taper profile system, moves the power zone towards the top of the racket (which is the area where the majority of players strike the shuttle), whilst also giving greater flexibility across the hitting area dramatically improving control for touch shots.

High quality M30S intermediate modulus graphite is used throughout the Mystique, producing probably the most powerful badminton racket in the world.

By using Ashaway string, undoubtedly the finest badminton string, the Mystique racket enhances its already exceptional playing characteristics.

The triple taper system, wide at the top of the head, narrows at the centre, wide at the shoulder.

MYSTIQUETM
SERIES

RACKET SPECIFICATIONS	
STRUNG WEIGHT	98 - 103 grams
CONSTRUCTION	100% M30S graphite
FLEXIBILITY	Medium Stiff
