WILL YOUR OPPONENT END UP IN ONE PIECE?

The Powerflo series marks a revolutionary development in the design of one-piece graphite badminton rackets.

The head, shaft, ferrule and handle are moulded in one procedure which creates a unique racket that is visually stunning and technically superior.

The tapered ferrule allows uniform flexibility throughout the shaft which produces greater power transfer. It also reduces twisting at the base of the shaft to provide increased accuracy and improved

shot placement.

Although it generates unbeatable power it's sensitive too. The one-piece construction enables a direct transmission of feel from the head to the handle.

Its wide body and aerodynamic cross sections give it rigidity, speed and stability through the air which adds to your ability to disguise shots and improvise at the net.

With so many powerful features the Powerflo range almost gives you an unfair advantage.

As your opponent will soon discover.

A MESSAGE from the BOARD

of the Southern California Badminton Association

As Board Members, the question we are most often asked is, "What is the SCBA and what does it do for me?"

The Southern California Badminton Association is a non-profit organization which has been in existence for 50 years. As an Association we provide tournament information, organize local clubs, publish the *Shuttle Scuttle* newsletter, produce rankings and classifications for players, raise funds for badminton promotion, oversee the Yonex and Better Ways Grand Prix circuits, and promote junior and scholastic badminton. We also lend assistance to special projects and establish and administer merit awards. But working as a line of communication between players, clubs and schools is perhaps our most important function.

Through the hard work of many and the support of our badminton vendors, the SCBA is able to publish the current list of "Places to Play" and upcoming tournament schedule. With this booklet, we hope to provide needed and requested information for the Southern California player.

Jump up to refreshing play with a new racket. Yonex has specially designed to maximize power and minimize air resistance: Cab-21. To accomplish these, Cab-21 has a jointless construction — the Yonex built-in T-joint that builds in power and prevents torque; recovery is laser-quick. And it has an aerodynamic 7mm diameter full-carbon-graphite shaft that cuts the air like a knife. If you'd like this winning combination to make your game more of a smashing success, get a new Cab-21.
